Xryma PLC Listing Update

Following the Euronext Listing Committee's meeting, the Company has decided to postpone its planned admission to trading.

The Company remains fully committed to pursuing a public listing and will now take the necessary time to assess the most appropriate path forward. This includes considering a pre-listing private placement incorporating a contemporaneous share purchase from existing retail shareholders, or an IPO incorporating a primary and/or secondary offering, either of which may provide additional market validation of the Company's investment case.

The Company will continue to onboard shareholders and undertake all necessary preparatory activities in support of a future listing.

Further updates will be provided in due course, recognising the European summer holiday period.
